

Jordan Lee
Machine Learning Engineer

SUMMARY

Machine learning engineer with experience building retrieval, recommendation, and model-evaluation systems.

SKILLS

Python, PyTorch, FastAPI, PostgreSQL, vector search, experiment design, model monitoring

EXPERIENCE

Machine Learning Engineer, Example Analytics

- Built a retrieval pipeline for internal technical documentation.
- Defined offline retrieval metrics and production latency monitoring.
- Partnered with product and platform teams on staged releases.

PROJECTS

Role-Aware Interview Practice System

- Designed a five-phase interview workflow using resume and job-description context.
- Implemented question retrieval, structured scoring, and deterministic fallbacks.

Recommendation Experiment Platform

- Built candidate-ranking experiments with offline evaluation and controlled online rollout plans.

EDUCATION

BSc, Computer Science
